

# MIT APP INVENTOR

Date	3 September 2022
Team ID	PNT2022TMID05092
Project Name	Smart farmer- IOT enabled smart farming application

MIT App Inventor is an incredible web application that helps users build interesting Android applications. It is a block-based programming tool through which users can create fully functional apps for Android devices such as smartphones, tablets e.tc.

## Step 1:

- # Open MIT App inventor in browser.
- # Click create apps in the website.

## Step 2:

# Create user interface from the MIT App Inventor

# Various components are used to design the app and give a look and feel appearance.
